

## Wayfair Guide

JOIN <https://t.me/acbae> FIRST

This is a guide on how to purchase and use the Wayfair accounts correctly to get orders to work.

Before starting the process please remember Wayfairs are not GUARANTEED.

Please don't spam msg me or haytch as we get spammed every fucking day.

### HOW TO PURCHASE BTC TO GET ACCOUNTS (Skip this if you aren't a idiot)

Disclaimer: If you ARENT 18, just get someone else's ID and make the account in their name.

1. Download any of the following apps (I recommend Coinbase): Coinbase, Coinfalcon, Blockchain.  
Any btc purchasing/sending wallet will do.
2. Once you have downloaded any of these apps, add in your cc and verify your account so you can send and receive btc
3. Once verified you are ready to buy accounts.

### HOW TO PURCHASE ACCOUNTS

1. First join <https://t.me/acbae> to get notified for updates so you don't miss out on a fresh batch.
2. After joining the telegram chat, head over to [acbae.shopsn.su](https://acbae.shopsn.su), the page is in Russian, but you can translate the page on pc or follow this picture guide.

<https://gyazo.com/1f2d7367054209d8e3fce0e1e573fe49>

3. Purchase as many Wayfair's as you want and a NordVPN account (REQUIRED).

### HOW TO BANG AN ORDER

Please only use the app, it does not work for the website

1. First turn on 4G data
2. You CAN use Wi-Fi however its likely your IP will get flagged meaning you will not be able to use accounts properly
3. Login to the NordVPN account and connect to a USA location (important)
4. Once you have the app proceed to login to the account on the app
5. If you successfully log in, go to look for an item you want, add it to the basket
6. Now when your item is in the basket the option for address and payment option should be empty

6.1 If its not empty you will need to use another CC (like StockX) to attach one , you should add your own cc under your drop addy as billing, freeze the card or remove all the smoney (if its not your CC then don't worry about it) after the purchase declined address should be verified on account.

7. Add your drop into the address part and select the attached CC for the payment method, then place the order

8. Now that your order has confirmed, you want to start changing all the details on the site

9. Go to account settings and change email, password etc.

10. Once that is done, you can now flood the holders email using floodcrm

If you have questions msg @r1skip on telegram or snapchat or @haytch on telegram.
